

## Notice to all State Certified Contractors

As you may be aware the State of Florida has enacted a law prohibiting local enforcement agencies from **requiring** the payment of a fee associated with providing proof of licensure, recording or filing a license, and providing evidence of workers' compensation insurance.

In compliance with the newly enacted law, the City **does not require a State Certified Contractor to pay fees** for filing a license, to provide your state license, liability insurance, workers' compensation insurance and/or exemption and a copy of your business tax receipt at the time of permit application. The qualifier may apply for a permit at any time with the required documents without having to pay a required fee.

**As a convenience, upon request**, the City will maintain copies of all required documents on file so that the qualifier may avoid the need to appear in person each time a permit is applied for. There is a service user/document storage fee of \$25.00 per year that will be charged in the event that you elect to request that the City store your records with the City for your convenience.

Respectfully,

Marc Meyers
